

PlasmaMade – Your Partner fighting COVID-19

Clean and healthy air in any room.

The plug-and-clean solution

Whether in fitness studios, restaurants, retail stores, offices, medical practices, schools or kindergartens - the PlasmaMade AirCleaner was developed to clean the air of dangerous aerosol mixtures, viruses, bacteria, pollen and odors. Thanks to the modern PlasmaMade technology, the AirCleaner is also able to remove the SARS CoV-2 coronavirus from the air.

The PlasmaMade AirCleaner is efficient, very quiet and easy to use. You can effortlessly clean up to 400 m³/h air. The high-performance filters can be used even in large rooms up to 150 m². Due to practical rollers, you can use the device where you need it at any time - all you need is a socket.

By sucking in polluted air close to the floor, the PlasmaMade AirCleaner, in combination with the special air outlet on the top, creates a downward circulation of air that pushes down aerosols, viruses and bacteria.

This way, pollution is displaced by the purified air and passed on to the AirCleaner - the risk of infection and spreading the virus is reduced.

The PlasmaMade AirCleaner combines 4 modern filter systems:

- PlasmaMade Airfilter with patented plasma technology
- Electrically charged Nano filters based on fiberglass
- Electrostatic filters with two metal cores
- Ceramic filter

Control your air quality

Using the combination of AirCleaner and Air Sensor you clean the air and learn more about the exact composition. The performance of the device can be adapted individually and effectively to your needs. The dashboard is compatible with almost every technical device including smartphones or tablets and delivers data in real time.

The whole package:
AirCleaner and Air Sensor

The most important data at a glance

- Size: 340mm x 340mm x 1700mm
- Weight: 40 kg
- Air filter performance: 200-400 m³ / h
- Suitable for rooms up to 150 m²
- Flexible use
- Power consumption: 125 watts
- Maximum volume: 39 dB
- 2 years of guarantee
- Durability of the filters:
PlasmaMade Air Filter: 5 years
PlasmaMade Prefilter: 1 year
- CE certified

Your partner against COVID-19

The new PlasmaMade AirCleaner AAC371170 with patented technology has been specially developed to reduce aerosol pollution in the air in gyms, restaurants, hotels, retail stores, medical practices, schools and many other public spaces. The PlasmaMade AirCleaner can reduce the aerosol loading to an almost sterile level in no time at all.

Due to the patented PlasmaMade technology, low air exchange rates within an hour are sufficient to reliably and sustainably remove aerosols from your room air. The power consumption is very low, which converts the AirCleaner an absolutely effective and efficient solution to fight aerosols.
